

This is a small guide on how to insert a link to your next page after the optin page. This is exclusive to mailchimp.

This next page can be a thank you page, optin confirmation page or simply your sales page.

Step 1: login to Mailchimp and go to the list

Step 2: Click the drop down menu to select.

The screenshot shows the Nacashkid interface. At the top, there is a navigation bar with a monkey icon and links for Campaigns, Templates, Lists, and Reports. Below this, the user's name 'Nacashkid' is displayed, followed by a 'Switch list' link. A secondary navigation bar contains links for Stats, Manage contacts, Add contacts, Signup forms, and Settings, along with a search icon. The main section is titled 'Form builder'. Under the heading 'Forms and response emails', there is a dropdown menu currently set to 'Signup form'. A red arrow points from a red-bordered callout box to this dropdown menu. The callout box contains the text 'Click this menu and select confirmation page'. Below the dropdown menu, there is a checkbox labeled 'Let subscribers pick email format (Plain-text or HTML)' with an 'Info' icon to its right. At the bottom, the text 'Signup form URL' is visible.

Step 4: Then enter the link to the new page and save.

The screenshot shows the Mailchimp 'Form builder' interface. At the top, there's a navigation bar with 'Campaigns', 'Templates', 'Lists', and 'Reports'. Below this is the 'Form builder' section. Under 'Forms and response emails', a dropdown menu shows 'Confirmation thank you page'. There's a checkbox for 'Let subscribers pick email format (Plain-text or HTML)' with an 'Info' link. Below this are three tabs: 'Build it', 'Design it', and 'Translate it'. The 'Build it' tab is active. A red box highlights the text 'type the link to the next page here and save' with an arrow pointing to the URL input field. The input field contains 'https://johnboscoife.com/'. To the right of the input field is a 'Save' button.

Build it Design it Translate it

Instead of showing this thank you page, send subscribers to another URL

Save

That's all and you are good to go.
